

Service Bulletin

No 21 rev 0 2019-03-26

Seals on the Deckma OMD-24, 15 PPM Bilge Alarm

System:

This Service bulletin is valid for the Marinfloc Oily Water Separators and Marinfloc Whiteboxes supplied with the Deckma OMD24 oil content monitor.

Description:

Deckma fasten sticker seals on their OMD-24 Oil content monitor computer units, the oil content monitor cells and the magnetic valve attached to the oil content monitor. This service bulletin highlights those seals and is a reminder of never removing/breaking them. The purpose of the seals is to illustrate that the equipment never has been tampered with.

Oil content monitor computer units

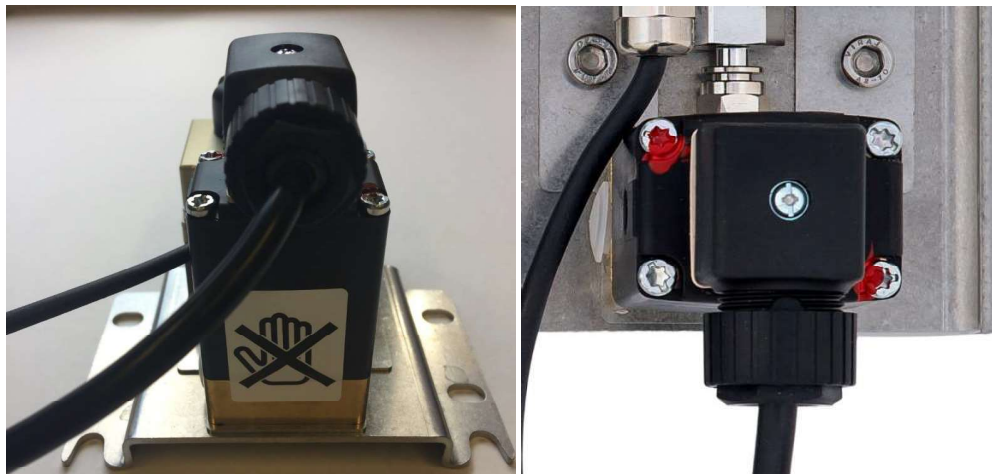

The OMD-24 EV Bilge Alarm is sealed according to picture. Do not break the yellow seal.

The oil content monitor cells

One seal sticker in combination with a metal clip on the measuring cell (Label work as seal)
Do not remove the sticker

The Magnetic Valve

One seal sticker and two sealed screws on top of the valve.
Do not remove the seals. You are not allowed to open up the valve for cleaning purposes you are only allowed to replace the valve with a new one. The two sealed screws should never be opened. Some valve distributed are missing the sticker (PN 00212381/00314402) on the bottom of the valve but the screws are sealed with the red paint.
